

**Community, Staff and Student Involvement in Decision Making  
and Communication with the Public**

The Board views community, staff and student participation as essential to good decision making. To the extent consistent with sound management and fiscal responsibility, the District encourages community members, staff and age appropriate students to participate in its committees, public forums and other planned activities. The District welcomes the input of all of the community's stakeholders during its policy formation and during its decision making.

To facilitate community involvement and enhance awareness of school issues, the District maintains regular means of communication with its stakeholders through the issuance of annual and other reports which will be available to any interested member of the public or media. The District's reports help identify school needs and priorities and report on the results achieved through the public's support of the District's educational programs.
