

Student Fees, Fines and Charges

Recognizing that it is the public's responsibility to fund a free public education for all students, but also recognizing that there are severe restraints on the school budget, user fees and charges may be imposed in order to carry out enrichment and extracurricular programs. User fees and charges are to be imposed only when other funding is not available. Payment of a user fee or charge merely permits participation in the activity and in no way guarantees playing time on a sports team or any other privilege. Amounts to be charged will be based on the cost of the activities.

No user fees or charges shall be imposed on a special education student for whom specified extracurricular activities are an essential component of the Individual Education Plan (IEP).

In an effort to ensure that enrichment and extracurricular activities are accessible to all students, regardless of income, fees and charges may be waived for students who demonstrate a need. Waivers are to be provided in a confidential manner to avoid stigmatization of students.
